DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Species I: main door swings toward cockpit
- b. Species II: main door swings toward the cabin

Also when one of the above is chosen, one of the following subspecies must also be chosen.

- i. Sub Species A: 1 Flap door in the vertical configuration
- ii. Sub Species B: 2 Flap doors in the vertical configuration
- iii. Sub Species C: 4 Flap doors in the horizontal configuration

Also when one of the above is chosen, one of the following secondary subspecies must also be chosen.

- (1) Secondary Sub Species 1: Flap doors swing toward the cockpit
- (2) Secondary Sub Species 2: Flap doors swing toward the cabin

Art Unit: 3643

For **example** you must choose something like: **Species I, Sub Species A, and Secondary Sub Species 1**, which would be a main door that swings to the cockpit and a single flap door in the vertical configuration which swings to the cockpit.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 3643

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

2. A telephone call was made to Mr. Daniels on 8/31/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
